Hempstead county cattlemen can make 1944 a banner year by putting their herds on a producing ly assimilated foods, reaches the First class cats are white, second level in line with their farm feed bloodstream five minutes after class green, and third class are supply and investing the savings being swallowed. n War Bonds, Oliver L. Adams, county agent, declared this week. With good permanent pasture and range prospects for early summer gains and a high lespedeza acreage for obtaining a finish on cattle which will ensure their sale as killing cattle, Hempstead county farmets can help Arkansas surpass its record cash income o According to Agent Adams, there are more beef cattle in the county this year than there have ever been, and the average quality is higher as a result of the use of purebred sires during the past 10 years and of some culling last fall. With existing labor conditions fo harvesting feed and the relative small amount of winter feed supplies for the number of cattle to be fattened and maintained, Hempstead county farmers were advised grass gains are made and to invest he profits in bonds. This applies o older steers, dry cows to be culled from the herd, and early

1944 May Be

calves from the excellent herds in the county, he specified. Because the general price level of grass-finished cattle in relation to grain-finished cattle is high it s good business to obtain and sell as much weight from grass as possible this year. Adams recommened that harvested feeds be used with fewer cattle during the coming winter - that is, that COOL. EASY-TO-TUB

W. S. ATKINS,

I DIED TODAY... WHAT DID YOU DO? 5 REASONS FOR INCREASING

TF shat you did for the war effort today was an easy thing to do, it isn't enough. We can not hope to give as much as the boy who gives his life ... but we can do our utmost!

For instance, if you haven't yet found yourself scheming and figuring on a way to buy extra War Bonds, it's a good sign you aren't buying enough! When your neighbor calls on you during the 5th War Loan to ask if you'll increase your purchases, say "Yes"... even if it takes a lot of scheming and figuring afterward to pay for them.

That's the way our men are doing their part .. in the Pacific, in Italy, in England. Ordered to attack, they do not first consult themselves to determine whether it's safe or convenient or comfortable. They're thinking of you at home. To protect you, they attack first ... and figure out how to do it as

Uncle Sam needs your dollars to finance this war and he needs them now! Not just the dollars you can spare but every dollar you can earn that you

don't absolutely need for food, shelter, clothing and the operation of the farm.

War Bonds savings mean more to the average farmer or rancher than to almost anyone else. For they form a financial reserve indispensable for the profitable and efficient operation of his business. War Bonds are safe, they pay a good return, they're easy to buy. When they mature, they mean new machinery and equipment, new conveniences for the house, money for the children's schooling, funds

Most of us haven't yet begun to do our best. Uncle Sam needs it now! BUY MORE THAN BE-FORE in the 5th War Loan!

MONEY, individuals are not buying their share of War Bonds, America must corect this situation. 3. War Bonds provide the farmer and rancher with the financial reserve he must have to survive the ordinary ups and downs of farming as a business.

The next time you pick up your paper or listen to the radio news, have a conference with yourself. "Am I doing as much as I can to help win this war? Am I matching what I can do with what the boys are doing over there? Am I investing every possible dollar in War Bonds today to make my future and my family's future more secure?"
